

Environmental Benefits of the Charcoal Filtration Device The Vent Pipe Filter with Activated Charcoal.

The Charcoal filtration Device removes Hydrogen Sulfide from septic tank gas at the vent pipe. These gases are hazardous to your health and the environment.

The following articles describe the hazards of **Hydrogen Sulfide (H₂S)**, and do not mention our products at all.

We provide links to these articles so that you may educate yourself about Hydrogen Sulfide (H₂S).

These articles are not endorsements of our filters. Inclusion of these links on our web site should not be construed as an endorsement by their authors of our products or company.
