

**EXTEND & LOK<sup>TM</sup>**

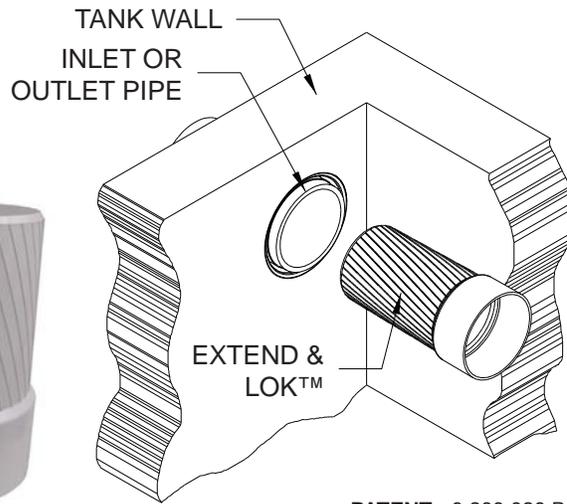

Our Extend & Lok<sup>TM</sup> is a simple, easy to use solution that can extend the inlet or outlet pipe, and make filter and/or baffle installation a snap. No more fighting with outlet pipes that are flush against the septic tank wall. Simply hammer in the PVC friction fit Extend & Lok<sup>TM</sup> and that's it! The filter or inlet tee can now easily be installed and centered under the riser.

**FEATURES**

- Fits any 3", 4" or 6" pipe
- Centers filter or tee under riser
- Easy Installation
- No gluing necessary

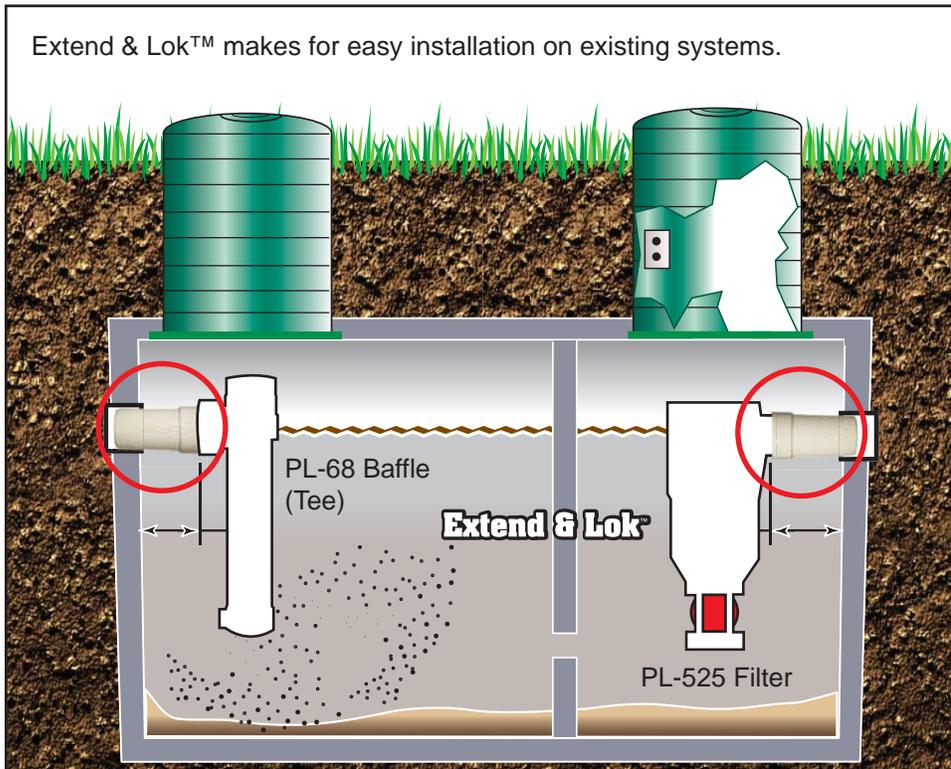

**Makes Filter Installation EASY!**  
Easy to install in hard to reach places.

PATENT • 9,233,323 B1

Extend & Lok<sup>TM</sup> makes for easy installation on existing systems.

Before (cast iron pipe)

After (4" Extend & Lok<sup>TM</sup>)

With PL-68 Filter & Tee
