

Trenching Cables Electrician Wasted Time

NEW Tank Alert® ABW wireless alarm system

This easy-to-install alarm offers **freedom** to both installers and homeowners. The **NEW Tank Alert® ABW** alarm system features a battery operated **wireless transmitter** that is placed in the tank (up to **150 foot range** from the indoor alarm). An electrician is not required since **no hard wiring** is needed. When the high water alarm float switch activates, the transmitter sends a signal, sounding the indoor alarm. With **no cable** to bury, installers don't need to haul heavy equipment to the site to dig up the homeowner's yard.

Alarm Features:

- Automatic alarm reset
- 9 VDC battery backup
- Alarm test switch
- Alarm silence switch
- Green power on indicator
- Red alarm indicator
- Low battery chirp
- Loss of signal alarm
- Option to monitor additional level via hard wired control switch

Transmitter Features:

- Remote wireless transmitter with up to **150'** range
- Lithium battery lasts two years
- Tested to comply with **FCC standards**

For distribution in the United States and Canada only.
See reverse side for installation drawings.

Shown with
Mounting Bracket

NO more digging up the homeowner's nicely landscaped yard to trench in float cables.

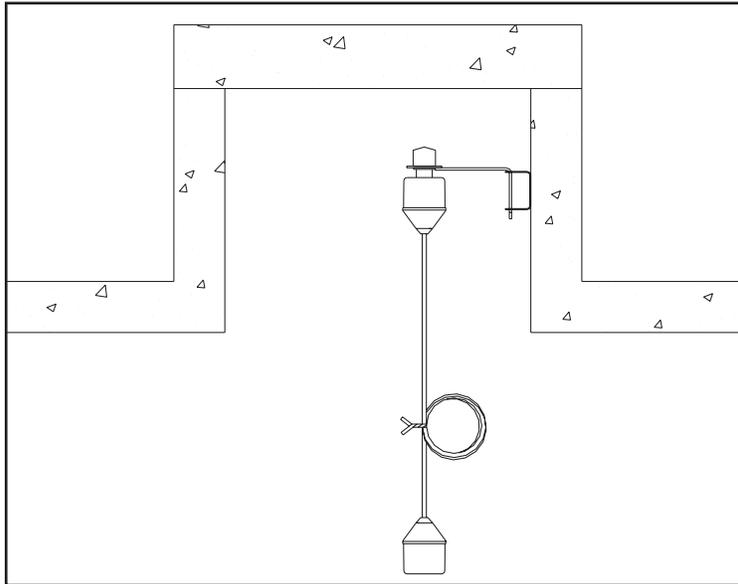

NO more wasted time or money hauling heavy equipment to the job site to install an alarm.

NO paying an electrician to wire the alarm.
